

It is called a Platform because that is what it is: a solid platform on which you can build your business systems. We have taken the main issues that you'll face and translated them into a range of simple to use tools you can use to build relationships with customers.

Underpinning it all is rigorous security; the biggest open-source software community in the world and industry standard database software.

That means that you are not locked into any "proprietary" solution and can always get support from any one of the tens of thousands of Microsoft Certified Developers there are in the world.

And that's as technical as most folk want to get; but for IT specialists we are happy to go into as much detail as you need... just call us and ask; we have nothing to hide!

What It Is

A solid, dependable, easy to use Content Management System.

A customisable Customer Relationship Management System.

A wealth of other add-ons and plug-ins.

A support and update service second to none.

Industry standard software and world class security.

What You Get In Return

Easy to edit content.

Total control of your own website.

Help whenever you need it.

Peace of mind that your website will run securely 24/7.

The ability to develop your own unique customer relationships.
